Dear customers,

*Kaiser* is greeting you on the pages of our catalog! Welcome to the world of modern home appliances!

The fundamental idea behind developing of the technology *Kaiser* — to make the power of the modern and beautiful innovation work for the benefit of modern and beautiful people.

This idea constantly motivates our engineers and designers to improve our technology to comply with all requirements of our customers and to fulfil the modern lifestyle.

Owing to use of the latest know-how the technology *Kaiser* has a wide range of applications, of the automatic functions and the ease of use and maintenance.

Our domestic appliances are distinguished by their unique design as in classical as well as in innovative shape.
We make become reality things, which were previously considered as the science fiction: self-cleaning dishwasher, ultrathin Induction- hobs whose surfaces are so safe, that the burning is excluded, multifunctional ovens, which can be easy cleaned even after intensive use.

Our slogan — **Power in action**.

The resources invested in design and technical performance pursue the target - to convey our customers the **Power in action** of our technology.

We care about the well-being of our customers.

Faithfully yours

*Kaiser*

Ovens and built-in cookers
ELECTRIC OVENS

Kaiser has developed a model range of ovens with the energy efficiency class A. But our ovens are characterized not only by a low energy consumption, but also by very user-friendly operation and simple maintenance. The all aspects of comfort have been considered to make our customers feel satisfaction and pleasure in using of our technology. Our multifunctional ovens offer an exceptional variety of ways that ensure the optimal preparation of your favorite dishes. Electronic Logic Control, Nickel FREE Easy clean- enamel, catalytic clean system, Telescope system, rotisserie and many other features will bring you a lot of fun. The special system of external cooling enables you to install the ovens even in small kitchens, without causing any damage.

Logic control

The electronic system Logic control and intelligence system take control of the cooking process, while you are reading your favourite book or watching a favourite show. There is a recommended temperature for each cooking mode, but you can always change the temperature to your needs.

Electric rotisserie

The using of the electric rotisserie make your favorite dishes taste delicious. Depending on your culinary imagination you can use the rotisserie together with the infrared grill. This combination will lead to the superior cooking results. The infrared grill is ideal if you like to cook fish, steaks or toasts in the oven. If you like to eat crispy dishes, you can fry with gap open oven door or using the fan.

Telescope system

Many of our ovens are equipped with the Telescope system. This system ensures the gentle removal of the trays, resilient up to 15 kg. You can take out the trays also during the cooking. According to reports of our customers is the Telescope system very convenient and easy. If your oven is not equipped with the system, you can order it separately.

Multifunction

The numerous functions of the ovens allow the quick and delicious preparation of your favorite dishes. The ovens F12 Biturbo and F14 Biturbo are equipped with the all modern features. With these functions, you can adjust the oven individually, quickly and accurately.
ELECTRIC OVENS

Comfortable and pleasant control
The most ovens Kaiser are equipped with an ergonomic touch-screen control, from simple three-button touch control to the electronic Full touch control.

The cleaning of the surfaces of the ovens with full sensor operation is very simple and fast, because there are no convex buttons.

The ovens Kaiser are equipped with comfortable, ergonomic and elegant door handles made of solid metal.

Many models of the ovens are equipped with recessed PUSH knobs. In combination with the touch screen control it offers the high serviceability.

Easy clean — enamel Nickel FREE
The interior of many ovens is coated with the Easy Clean enamel Nickel FREE of Kaiser.

This enamel has the following features:

▪ Durable coating with long service life
▪ Easy care. Similar to pyrolytic cleaning, but at lower Temperatures
▪ Suitable for nickel allergy sufferers
▪ Hygienic
▪ Environmental Friendly
▪ Gloss, smoothness, color, weather and temperature resistance

This coating guarantees a healthy eating and easy cleaning of your oven.

Pyrolytic and catalytic cleaning
A permanent self-cleaning through catalysis cleans the hard to reach areas of the ovens as ceiling and rear wall: the fat and sauces splashes cannot be removed easier and more convenient. All of the fat substances will be catalyzed, evaporated, and eliminated at the temperature above 200 °C.

The interior of the oven with the pyrolysis function will be heated to the temperature of 400 °C. All organics will be decomposed by the heat and their molecules will be destroyed.

Recipes table
On the inside of the oven door you will find the recipe table. It helps you to find the required function and time to cooking of your favorite dish.

Cold front of the oven
The doors of the oven Kaiser have a special design. They are equipped with the double or triple glazing. This ensures good insulation, so that the front of the oven always stay cool.
Multifunctional ovens for installation in the tabletop

**Touch-Lift**

Magic
Touch a sensor key LIFT on a control panel. From a tabletop will go up an oven which is smoothly glittering of glass and stainless steel. The Lift ovens of the model range La Perle – are patented appliances for installation in the surface of tabletops. These models are complete answer to a problem of three dimensions. They combine the artistic vision of designer and innovative constructive solutions of engineer.

The Lift ovens are elegant magic helpers for fulfillment of the most demanding culinary fantasies.

Kaiser oven EH 6907 GW

Kaiser oven EH 6907 GW of the model range La Perle contrasts sharply from other devices because of its clear geometric forms, ease of use and innovative functionality.

The oven has 14 operating functions. This 67 liters Full-size oven with glass shelf SCHOTT CERAN warming drawer can be installed in a standard niche 60x60 cm, owing to the integration of the sensor control in the device door. The enhanced functionality of the oven gives you the possibility to obtain the heat of your favourite dishes and warm the plates. If you want to speed up the heating of the oven, the Turbo heat function is provided special for this purpose.

Many other functions as the top and bottom heat, hot air system and infrared grill ensure to prepare your dishes with the great care, juicy, spicy and tasty. The 3-fold Telescope system that can be used in any of 5 levels, as well as the universal glass tray Crystal provides the preparation of your favourite dishes. Each level of the system keeps the weight of up to 25 kg. The interior of the oven is coated with a Nickel FREE Easy clean enamel, which guarantees a healthy eating, easy cleaning, environmental friendliness and durability. Function of the fast cleaning Turbo clean combines in itself functions of catalytic and pyrolytic cleaning. It makes cleaning significantly easy and saves valuable time and energy.

The Kaiser oven EH 6907 GW is the right choice for you, if you want to delight your guests.

Warning drawer, used for cookware heating, has several additional features:
- sponge dough making
- keeping dishes warm
- defrosting
- delicate cooking, using temperature up to 70°C

**GAS OVENS**
Hobs
**GLASS CERAMIC HOBS**

**Induction hobs**

- **Induction heating** — the most innovative solution in the area of the glass ceramic hobs.
- **Induction hob** is the smartest hob. Automatic power on-off function— the hob will be activated only if the pans are on the surface. If the pan is standing only on the half of the cooking surface, only this half will be heated.
- **The fastest heating rate**: 4 liters Water can be boiled in only 9 minutes.
- **The fastest reaction and sensitive control** — More comfortable than by other regular gas hobs.
- **The best time and energy save** — Compared to other types of hobs, the energy consumption will be reduced by minimum 30%.
- **The best way of cooking** — It combines all the advantages of the electric and gas hobs.
- **The cleanest surface** — It will never burn something, because the surface of the hob stays cool. It will be heated only the place, where a dish stands. For cleaning is it enough to wipe the surface with a damp cloth.
- **The simplest operation** — With a slight finger touch you can control all processes. With the **PAUSE** feature you can temporarily stop the cooking process and then continue it again.
- **The safest cooking surface** — If you remove a pan from the surface of the hob, it will become cold immediately. There is no more risk of unintentional on/off switching.

**Comparative diagrams of efficiency and heating rate for the hobs of different types**

---

**Glass Ceramic Hobs Hi-Light**

**Flash heating**

The glass ceramic hobs *Kaiser* with the **Hi-Light** heating elements use the **flash heating** system. The maximum temperature will be reached in few seconds and then it will be reduced to the selected temperature. This system reduces the heating time of the cooking hob, so the energy consumption will be reduced too. The glass ceramic hobs are also distinguished by their elegant design.

**Sensor Touch control**

makes the control of our domestic appliances especially comfortable. **Touch control** of the ceramic surfaces ensures the reliable operation and easy maintenance. The smooth panel without any convex buttons is also an attractive design element. The cleaning of the surfaces with the full sensor operation **Touch control** is very simple and fast, because they do not have any convex elements. After simple wiping with a cloth or a napkin, the surface looks shiny and clean.
GLASS CERAMIC HOBS

Ceramic induction hob with free heating zones, which allow to place pans anywhere without worrying about the number and size

- Number, shape and size of dishes are unimportant
- Full freedom of movement of cookware on the heating field
- Activation of the cooking zone only under the cookware
- Ultra-fast heating function Power
- Function KEEP WARM
- Timer/ minute counter for each of the four cooking zones
- System for automatic shutdown Safety Guard

Not only black – cooking hobs with artistic design:
KCT 6912 F Geo, KCT 6512 F Ära, KCT 6512 F Herd

Decorate your kitchen with a glass ceramic hob. These hobs have memorable design, graphics which applied under the glass surface and therefore protected from abrasion. Traces that may occur with prolonged use of standard surfaces with black colouring on these models can not be seen. The hobs fit well into all kinds of kitchen designs.

The dual heating zones – round and oval (for roasting pans) allow to prepare a variety of meals in cooking ware with different bottom diameters and with oblong bottoms.

Fully sensor electronic controls Full touch provides accurate power setting, function Child lock, automatic shutdown function Safety guard, as well as LED indication of working zones of heating and residual heat.

Design cooking hobs with different graphics boost spirits and as a result – the quality of prepared dishes.
Power
**INDUCTION GLASS CERAMIC HOBS**

**La Perle**

**Free Zone Power Induction**

**KCT 95 Fi LaPerle**

**Design**
- Product line La Perle
- Black glass ceramic SCHOTT with bevels

**Controls**
- Electronic sensor control Full Touch
- Touch Control Power Slide
- LED displays
- Child safety lock
- Timer for each cooking zone
- Minute minder

**Comfort**
- Booster function Power for all cooking zones
- Induction cooking zones, self-adjustable according to size of an utensil
- Automatic shutdown system Safety Guard
- Residual heat indicators
- Shock resistant ceramics, glass with durable graphics
- Easy to clean

**Equipment**
- Clean scraper

**Technical specifications**
- Induction heating elements:
  - 4 zones: 19.5 x 22.0 cm, 1.8 kW (3.0 kW)
  - 2 zones: 39.0 x 20.0 cm, 3.0 kW (4.0 kW)
  - 1 zone: Ø 28.0 cm, 1.8 kW (3.0 kW)
- Total power, kW: 10.8
- Net weight, kg: 19.0
- Gross weight, kg: 21.0

**Dimensions (H x W x D, cm)**
- Unit dimensions: 5.5 x 90.0 x 52.0
- Cut-out: 87.5 x 49.5
- Dimensions in packaging: 14.5 x 105.0 x 67.0

---

**Freezone induction hobs**
with free heating zones, which allow to place ceramic induction hob cookware arbitrarily, without worrying about the number and size

**Rectangular induction coil**

**Schock resistant glass ceramic surface**

---

1. **Touch control system**
   The modern technology. Delicate, precise and punctual control.

2. **«Cold» surface**
   The surface out of a zone of contact of tableware with a heating field remains «cold» that provides high safety and ease of cleaning.

3. **Function Power**
   Within several minutes the power of a heating zone is spreading entirely or partially to another.
   For example: from 1.5 to 2.0 kW, 2.1 to 2.8 kW, 2.6 to 3.6 kW which leads to extremely fast heating.

4. **Full touch** sensor control.

5. **Automatic tableware detection**
   The ware made not from a ferromagnetic material won’t heat up. A certainty that distinguishes the skillful use of technology for the consumer’s benefit.

6. **System lock (Child lock)**
   To avoid an undesirable operation the control panel can be blocked. Tranquillity for a worry-free life and safe, confident use.

7. **Residual heat indicator**
   Indicates when each cooking area is hot after use. The indication is extinguished if the temperature falls below 60 °C.

8. **Glass ceramic hob**
   With the presence of a frame, facilitates the flush mounting of the work surfaces made of any material in the kitchen.
   An esthetic pleasure combined with greater ease of cleaning.

### The working principle

The functional principle of the induction hob is based on the use of magnetic field energy.

Under the glass ceramic surface is a high frequency induction coil, which generates the alternating magnetic field.

This alternating field generates eddy currents in the bottom of a ferromagnetic pot and heats the pot content.
Advantages of induction hobs.

The induction hobs have many advantages over the conventional gas and electric hobs. Induction hobs ensure the highest accuracy of heating. They respond very fast to every change of settings and any temperature changing takes place immediately. Although the heating time is much shorter, it can be saved up to 10% energy.

The Power function allows to share the power of one heating field with the neighbor heating field. The Tableware will be heated only when a pan with the ferromagnetic bottom stand on the hotplate. The heat production will be stopped immediately, if the pot will be taken out from the hob.

The hob surface will not be heated by the induction process but only by the heated pan. That is why the burning of spilled food is excluded. After turning off it will become cold in a few minutes.

Easy maintenance: The surface of an induction hob is perfectly smooth, so a simple wiping with a damp cloth is enough to make it clean.
INDUCTION GLASS CERAMIC HOBS

Design
- Product line: **Empire**
- Black/ivory glass ceramic front and rear solid metal plates: Bronze

Controls
- Electronic sensor control: Full touch
- LED Displays
- Child safety lock
- Timer for each cooking zone
- Minute minder

Safety Guard
- Residual heat indicators

GAS HOBS WITH GLASS TOP

**Ergonomically designed, comfortable pan supports** are made of high quality cast iron or steel with a durable enamel finish. In both cases, its shape allows for reliable use cookware of any size, even a very large. Pan supports are easy to clean in usual kitchen sink and dishwasher. Pan supports designed and made without sharp corners and it makes them easy to clean.

**Stainless steel knobs**
Control knobs of all gas hobs are stylish and made of stainless steel, it is same as in many built-in ovens Kaiser, which allows you to create exquisite design of your kitchen, using different elements of our appliances. Besides to the beautiful appearance the knobs are very convenient for the gas adjustment, also it is excellent for cleaning.

Cooker hoods
In certain cases chimney hoods can’t be optimally adapted to the kitchen design. If you consider having a built-in hood, the air will be fresh and clean and design of your kitchen remains without modification. You get cooker hood, as well as an illumination source. When pulling out the front panel, the lighting is switched on and you have to adjust only the speed you need. Each cooker hood has carbon filters to neutralize odours, and metal grease filters, which are suitable for washing in dishwasher. The keys with lighting allow, depends of the food you cook, to switch the light on and off and choose suction power. Thanks to modern high-performance engines and improved noise insulation built-in cooker hoods Kaiser are excellent for use as air filter. Front panels in stainless steel with anti-touch effect offer the possibility to make the kitchen styling according to your wishes.

Built-in cooker hoods open automatically when you pull out front panel and closes after operation finish. The display shows you when to replace or clean the filter. The electronic control for LED lighting makes the operation of cooker hood effortless and easy.
WALL-MOUNTED COOKER HOODS

Features
- 1 grease filter
- 2 charcoal filters
- Light — LED, 2 x 1.5 W

Equipment
- Pipe adapter 150-120 mm
- Aluminium pipe

Controls
- Electronic controlled programmer
- Electronic full sensor control Full Touch
- Multilingual TFT touch screen display

Comfort
- Timer
- Lighting, independent of cooker hood
- Rim ventilation
- Low noise
- Dishwasher-suitable grease filters

Technical specifications
- Energy efficiency class: A
- Suction power, m³/h: 1200

Features
- 1 grease filter
- 2 charcoal filters
- Light - Halogen, 2 × 20 W

Equipment
- Pipe adapter 150-120 mm
- Aluminium pipe

Control
- Electronic controlled programmer
  Logic control
  Electronic / Soft touch / buttons with lighting

Comfort
- Lighting, independent of cooker hood
- Low noise
- Dishwasher-suitable grease filters

Technical specifications
- Energy efficiency class D
- Suction power, m³/h 780
- Motors 1
- Speeds 3
- Operation mode Exhaust / Recirculation
- Output hole size (mm.) 120/ 150
- Net weight, kg 19,0
- Gross weight, kg 23,2

Dimensions (H × W × D, cm)
- Unit dimensions 55,0 × 90,0 × 50,0
- Dimensions in packaging 55,0 × 90,0 × 50,0
- Dimensions in packaging 56,0 × 96,5 × 41,0
WALL-MOUNTED COOKER HOODS

Design
- Product line: **Avantgarde**
- Chimney hood
- A 6419 N / A 9419 N – Stainless steel with Anti-Touch effect / smoke colored glass
- A 6419 S / A 9419 S – Schwarz / smoke colored glass

Features
- 1 grease filter
- 2 charcoal filters
- Light - Halogen, 2 × 20 W

Equipment
- Pipe adapter 150-120 mm
- Aluminium pipe

Control
- Electronic controlled programmer
- Electronic Soft touch / buttons with lighting

Technical specifications
- Energy efficiency class: D
- Suction power, m³/h: 780
- Motors: 1
- Speeds: 3
- Operation mode: Exhaust / Recirculation
- Output hole size (mm.): 120/ 150

Dimensions (H × W × D, cm)
- A 6419 ***: 50,0 × 60,0 × 50,0

Microwaves
MICROWAVES

Microwaves in Avantgarde® and Belle Époque designs will give a new shine to your kitchen. Thanks to the elegant and retro designs, finishing in stainless steel with Anti touch effect your microwaves can be easy combined with other household appliances Kaiser and give your kitchen designing more free space.

The microwave oven is equipped with tangential cooling air system, which protects the kitchen furniture from excessive heating.

The adjustable feet allow you to install a built-in microwave horizontally in a niche.

The design and the material of the feet ensure a stable fixation of microwave and minimize vibrations and noise.

The electronic control Logic control allows you to select the operating functions, presser programs according time, use various programs for defrosting or for heating.

If you select operating function, then you can defrost, heat, etc., and also cook your favourite dishes as in an oven.

A special feature of these microwaves is the automatic defrosting according weight and set cooking time. Few movements are enough to get a well-defrosted product in a few minutes!

The microwaves have Full touch sensor control, button control and rotary stainless steel knob, it offers more operation convenience.

The microwaves are also equipped with the stainless steel grill and the glass turntable, which are suitable for washing in dishwasher.

Dimensions of built-in microwave Kaiser allow the installing of the appliance in any type of kitchen furniture.

Glass turntable and stainless steel grid as well as universal Wonder-Plate with non-stick coating offers the possibility to prepare the food in different ways and also use a quartz grill.
MICROWAVE OVENS WITH QUARTZ GRILL

**Design**
- **Product line Avantgarde:**
  - **EM 2000** – Bluish black mirror glass door and control panel
  - **EM 2001** – Stainless steel with Anti touch effect

**Features**
- Stainless steel interior
- Circulation system
- Electronic timer

**Equipment**
- **EM 2000**
  - 1 Chromed multifunction roast shelf
  - 1 Turnable plate Ø 24 cm

Fridge freezer combinations
The fridge-freezers *Kaiser* are your best partners. You can rely on them for storage or maintenance of fresh and healthy foods.

The optimal combination of fridge and freezer compartments, the application of environmental and health-friendly materials in connection with the latest technological engineering are just some features which make refrigerators *Kaiser* so attractive and common to all who care about own health.

Our innovative system **BIO Safe**: an extra compartment which is equipped with an electronic temperature control from −7 to +4 °C. Your food can be frozen without loss of moisture. In **BIO Safe** can be gently freeze, allowing that food can be prepared immediately after removal it without thawing. In addition the food increases at the temperatures from about 0 °C its storage life.

The fridge-freezers *Kaiser Side-by-Side* offer plenty of space, in conjunction with the technical innovations and ease of operation.

---

**The fridge-freezers Side-by-Side** have **LED** lighting in both chambers, the door shelves there are at the two doors. It allows to keep the various goods with high comfort.

The fridge-freezers *Kaiser* have an energy efficiency class **A+**: they consume about 15 % less of electric energy than fridge-freezers with class A. And that’s thanks to the excellent thermal insulation and the high quality inverter compressors.

**Inverter Compressors**
Reduced power consumption, significantly lower noise level and long life time of the compressor. The Inverter compressors provide precise temperature control, the food will stay fresh longer. The temperature sensors in association with microprocessor technology optimize the engine performance for a maximum efficiency of cooling and freezing.

The unit defrosts automatically so that the maintenance and service of the refrigerator is kept to a minimum. The uniform temperature distribution is achieved in all chambers thanks to air recirculation, fine and precise temperature control in the chambers serves for fast cooling and freezing. Moreover this function provides fast recovery of the temperature level in the chamber after loading with multiple goods or after several door openings (positive impact on the quality of the food cooling and storage, energy saving).

Electronic **LED** equipment. The keeping quality of fruit and vegetables raises effective thanks to the special developed **LED** lighting cycles which improvise the daylight.

The capacious drink bar is equipped with its own small door. Just push the door to get your favourite cold beverage. *Kaiser MULTI-BAR* also has storage for four beverage cans.
FRIDGE FREEZER COMBINATIONS

**Logic Control**
The electronic control. Full control of the electronic system of the appliance and optimization of its work. It provides a wide range of temperature regulation of –22 °C to +8 °C, hereby it allows flexible and accurate setting for a maximum food storage. Separate control of the operating functions for the fridge and freezer compartments.

**Door racks**
The door racks KAISER LOGIC SPACE allow to place on them different goods like bottles, butter/cheese boxes, eggs etc.

**Cloud Fresh**
The equipment for the protection from bacteria and for the odour removal. The smells are absorbed and the freshness is maintained in chill fridge chamber.

**Bottle holder**
The special space-saving, elegant, chrome plated tray is suitable for up to 4 bottles.

**Height-adjustable glass shelves**
The extendable glass tops KAISER SAFETY GLASS are made from impact resistant, not scratchable, dishwasher suitable glass. The glass shelves provide optional use of the storage space and offer enough space for high objects like decanters, bottles, pots, etc.

Among other things the Zero-Zone allows gentle freezing. The isolated highly effective special compartment is designed for the best storage, cooling and freezing of meat, fish, fruit, vegetables and baby food. It is equipped with an electronic temperature control from –7 °C to +4 °C, so the food without loss of moisture to be frozen. It allows to prepare a food immediately after removal without thawing.

Ultra long storage of fruits and vegetables. The upper «dry» compartment is equipped with a lighting system DayLight. Food will stay fresh for a long time and it makes nutrition healthy and balanced.

Fruit and vegetable crisper allows to retain the right moisture content. The insulated compartment with ventilation and humidity control helps to preserve the moisture and nutrients of food.

Transparent freezer compartment made of frost-proof plastic. It allows, in comparison to traditional food storage conditions to maintain flavour and nutritional benefits immutable.

The Super Frost function allows a rapid freezing of stored food. The freezer compartment switches to normal operation in 24 or max. in 48 hours.

Signal – open door: if the door is open more than 90 seconds, the acoustic signals remind you that the door must be closed. The acoustic signals will stop after closing the door.

**Holiday mode**
In this operation, the temperature is set in the freezer at –15 °C and in the refrigerator at 7 °C. After the holiday mode is cancelled, the temperature goes back in the refrigerator to previously set values.

**Environmental protection**
The company's philosophy is not only based on the principle of high quality, but also focuses attention on eco-friendliness. The refrigerators by Kaiser are 100% recyclable. They are produced according to the US norms which means that no raw materials causing environmental pollution are used in the process of manufacture and the refrigerating agent R 600 A contains no components destroying the ozone layer. The insulation of the freezing compartments is made of the neutral for the environment foamed polyurethane and contains no harmful substances.

**DISHWASHERS**

**Fully automatic control**
Thanks to the electronic programmer *Logic Control* all stages of operation is fully automatic. You simply need to choose one of the washing programs.

**Sensor operation**
With the sensor operation *Touch Control* you always have everything under control. It is very simple and intuitive operation.

**LCD displays**
Many models of dishwashers equipped with bright, informative and multilingual *LCD*-displays. Display shows information about the program, countdown time and so on. The information is multilingual.

**So big your dishwasher can be**
Thanks to the new structure *XL* of our new model range the baskets and the interior become more space.

The machines with 45 cm width take not so much place in your kitchen and in same time have a wide capacity. You can place up to 10 complete sets of dishes in dishwasher.

In Dishwasher with 60 cm width you can place up to 14 complete sets of dishes.

**Removable cutlery drawer Komfort-Plus**
The dishwasher is equipped with a removable cutlery drawer *Komfort-Plus* for cutlery, which prevents the contact of the cutlery and better flushing guaranteed. After the rinse, you can remove the cutlery rack and prepare them easily and effortlessly for unloading.
**DISHWASHERS**

**Wave spray arms**
To optimize the rinsing quality special holes were designed for spraying. The holes are made under different angles, so each edge of the dishes will be fully washed and cleaned. The water currents do not interfere with each other there. The dishes will be perfectly clean and free of stains. Used for spraying multiple layers ensure optimal and economical washing.

**Stainless steel heating elements and interior tank**
Stainless steel interior tank ensures a long life of your device.

**Special framework for the cups and glasses**
The upper basket is equipped with openable framework, allowing you to place the cups, glasses and the high cup optimally on two levels.

**The additional third shelf Teleskop**
The new range of dishwashers is equipped with the additional third upper rack for the cutlery Komfort-XL, which significantly increases the capacity of the dishwasher. Special surface of third shelf prevents cutlery contacts and follows to better washing.

**The spacious vertically adjustable upper basket**
The upper basket can be adjusted at any height, so that the inner space can be used rationally.

**The framework for the champagne glass**
The folding frames have a special shape that offers optimal placement of champagne glass on the upper rack.
DISHWASHERS

Interior
The interior’s design of dishwashers Kaiser and dish racks provides maximum space for together washing of various kinds of dishes.

Detergent dispenser
Upgraded triple detergent dispenser minimizes the detergent and electricity consumption. The design of dispenser offers you a possibility to use all common detergents such as powders, tablets or liquids.

Extras inside the machine
Such extras as: Vertically adjustable upper basket, large cutlery rack Komfort- XL, especially comfortable original handles Kaiser will make you much pleasure in setting up and unloading the machine.

All baskets and cutlery racks are equipped with the system Teleskop.

Door
The door of the dishwasher Kaiser holds under any angle in the range from 0 to 90 degrees. Simply open the door and leave it open at the desired angle.

Aqua Stop function
All dishwashers Kaiser equipped with Aqua-Stop. The electronic system protects against the water leakage. Water supply will stop immediately.

Low noise operation
Dishwashers Kaiser are very quiet thanks to special technology of sound insulation and the latest trends in engine development. Nobody is disturbed by ambient noise of the machine.
DISHWASHERS

A++AA

Low power and water consumption
Extremely low power and water consumption of dishwashers with the energy classes up to A++AA are guaranteed by the latest developments in engine technology and the introduction of recent trends in dishwashing.

Auto program
Auto program offers you the service of future: dishwasher can automatically determine from the wastewater contamination during flushing if the dishes must be washed or it is clean.

Programm Glass für delikates Geschirr
This program gives you the opportunity to wash fine dishes, glass, porcelain with very gently rinse, to protect it from damage.

Programs and Functions

- Mode 3 in 1 - optimum results with washing tablets
- Program for crystal delicious dishes
- Start delay
- Half load

Light
Brilliant LED illuminate every single corner of interior.

The programmers of integrated models allow you to select different languages to make use of the dishwasher (German, English, Russian, etc.) easy.
